ROGER ROSENQUIST

SOFTWARE • CLOUD • PLATFORM ENGINEERING

Long Island, NY | Open to relocation | Email | Portfolio | GitHub

PROFESSIONAL SUMMARY

Computer Science graduate with four years of professional IT troubleshooting and two software-development internships. Recently built and deployed an authenticated AWS serverless app using Python Lambda, API Gateway, DynamoDB, Cognito, and CloudFront. Brings programming, cloud fundamentals, and production support experience to early-career engineering roles.

TECHNICAL SKILLS

Programming & web: Python, JavaScript/TypeScript, Java, SQL, React, Node.js, PHP, HTML/CSS, REST APIs, JSON

Cloud & systems: AWS (CloudFront, S3, Cognito, API Gateway, Lambda, DynamoDB, IAM, CloudWatch, WAF); EC2, VPC, RDS fundamentals; Linux, Windows, AD/GPO, TCP/IP

Development tools: Git/GitHub, GitHub Actions, automated testing, debugging, technical documentation

SELECTED ENGINEERING PROJECT

Serverless Job Application Tracker | AWS, Python, JavaScript Oct 2026

- Designed and deployed a CRUD application: CloudFront/private S3 frontend, API Gateway with Python Lambda handlers, and DynamoDB data persistence.
- Added Cognito authentication (PKCE), API JWT authorization, least-privilege IAM roles, CloudFront origin access control, and WAF protection.
- Built 24 automated Python/JavaScript tests, configured GitHub Actions CI checks, and documented deployment and architecture decisions.

PROFESSIONAL EXPERIENCE

Level 1 Technician | Artilus, Inc. · Mattituck, NY 2022–Present

- Investigate and resolve incidents involving user accounts, Windows/Chromebook endpoints, classroom devices, and network connectivity; own cases through resolution.
- Maintain Active Directory/Group Policy settings, support imaging and IP reservations, run ad hoc SQL queries, and document fixes/escalations.
- Troubleshoot issues across accounts, classroom systems and networked devices; communicate findings and coordinate with vendors.

Full-Stack Development Intern | Right Financial Advisor · Holbrook, NY 2016–2017

- Developed responsive retirement-risk application features with JavaScript, jQuery and Bootstrap, including financial projection logic.
- Translated business requirements and mockups into user-facing functionality; debugged and refined features with collaborators.

Web Developer Intern | Moka Graphics · Port Jefferson, NY 2015

- Created and maintained websites for business clients using WordPress, PHP, JavaScript, HTML, and CSS.

Additional projects: Two React/Node.js semester projects involving APIs, relational data and client/server debugging.

EDUCATION & CERTIFICATION

B.S. Computer Science | Stony Brook University Dec 2024

AWS Certified Solutions Architect – Associate | Exam preparation in progress
